KEY FEATURES

PICTURE QUALITY

UHD DIMMING

UHD Micro Dimming precisely scans an incredible amount of zones across the entire image and adjusts brightness to deliver deeper darks and brighter whites. It virtually eliminates the "halo" effect and image distortion, so you'll enjoy a crystal clear picture.

PRECISION BLACK (LOCAL DIMMING)

Experience sharper contrast with Precision Black Local Dimming. It dims LED lighting behind the darkest area of the picture for greater contrast and darker blacks, while the brighter elements remain as bright as they should be.

AUTO DEPTH ENHANCER

Auto Depth Enhancer is innovative picture technology that analyzes regions of each image and automatically adjusts the contrast for a greater sense of depth. As a result, everything you watch has incredible detail and appears more natural.
