

Clothespin Trivet

This trivet made of clothespins is a surefire conversation starter for your next afternoon tea.

40 spring-operated wooden clothespins
Dremel tool fitted with a drilling bit or a drill
Florist's wire

1. Disassemble all 40 clothespins.
2. Using the Dremel tool, drill a small hole in each clothespin half about 1/2 inch from the tapered end.
3. Thread the clothespin pieces onto the wire in the same direction until they form a circle.
4. Once you have a full circle, wrap the ends of the wire together and twist until the clothespins are tight and secure.
