Reference

Cross Reference Guide	C1
Abbreviations	C3

① **Smooth running coating** – optimised for harsh environmental conditions. Even on partly dry windscreens, the wiper blade slides wax and dirt easily off the windscreen

② **Soft flexible rubber compound** – used for the base. Provides optimised flip-over flexibility, quiet operation and uniform wiping.

③ **Wear resistant wiper blade edge** – for a long service life Ensures an efficient wiping action, so even the smallest micro-drops are removed

Top quality wiper action

- Right across the windscreen or rear window thanks to a custom-made spring strip. Provides precise and uniform distribution of the wiper blade's pressure along the wiping edge
- Aerodynamic spoiler for clear vision even at high speeds

New!

- Bosch's new Aerotwin flat wiper blades fitted with multi-clip adapters cover the four most important wiper arm connections used on the majority of today's cars, making them compatible with a wider range of vehicles

Bosch quality

- Longer service life due to uniform contact pressure
- Fewer problems with insects and stubborn dirt thanks to constant force distribution

Quality for all

- Bosch Aerotwin is also available for retro-fitting on passenger cars with conventional wiper arms

1) With Multi-Clip design cap on wiper arm can not be used
2) KUR – Multi-Clip wiper blade slighter shorter than original
3) Different Multi-Clip lengths (according to OE) may apply depending on the application. For details refer to application listing
4) Multi-Clip wiper blades can't be mounted
5) Assymetric lengths on passenger side

AEROTWIN Retrofit
Features

1. ‘Quick-Clip’ adapter
2. ...lift
3. ...hook

Cutting-edge technology for cars with conventional ‘hooked’ wiper arms

New technology bracketless Bosch Aerotwin wiper blades can be seen on more and more new model vehicles as manufacturers are selecting Aerotwin as the wiper blades of choice. These same wiper blades are now available as a retrofit to a range of vehicles built since the early 1990s and fitted with conventional ‘hooked’ wiper arms.

The flat and elegant hi-tech spring strips at the core of the Bosch Aerotwin replace the usual link and bracket arrangement of a conventional wiper blade. The curvature of the spring strips is calculated specifically to match the curvature of the vehicle windscreen.

Aerotwin retrofit wiper blades are fitted with a new style fastening mechanism with the Bosch ‘Quick-Clip’ adapter. This ensures the Bosch Aerotwin retrofit wiper blades hook easily into the conventional wiper arms.

Commercial Vehicle programme

The ideal commercial vehicle range

Just 18 wiper blades cover more than 97% of all commercial vehicles, buses and special vehicles.

- **New!** The innovative Aerotwin is now available for retrofitting on DAF, Iveco and Mercedes-Benz
- Extremely robust bracket design ensures very high stability for lengths of up to 1000mm
- Fitted with tried-and-tested dual material wiper for streak free wiping
- No lifting chatter
- Quick assembly

Bosch's introduction of Aerotwin flat wiper blades with Multi-Clip adapters.

Replacement Guide

When should wiper blades be replaced?

Checking for wipe quality

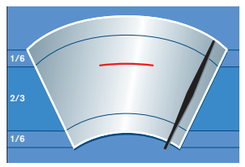

No action necessary

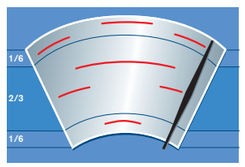

No streaking.
No action necessary.

A Maximum of 3 permanent streaks in the outer field of view.
No action necessary.

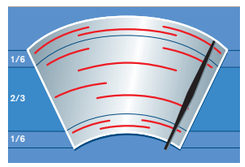

We recommend you change your wipers

A Maximum of 1 permanent streak in the central field of view.
We recommend you change your wipers.

A Maximum of 4 permanent streaks in the outer field of view or 12 temporary streaks across the entire field of view.
We recommend you change your wipers.

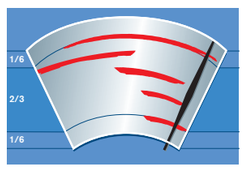

A Maximum of 6 permanent streaks in the outer field of view, many permanent or temporary streaks, evenly spaced.
We recommend you change your wipers.

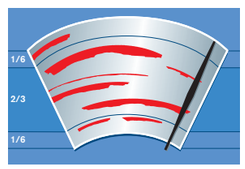

New wipers urgently required

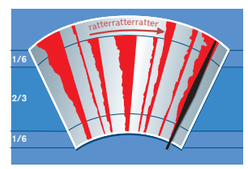

Patches of water remaining on any part of the area wiped.
New wipers urgently required.

Haze formation under the clamping points.
New wipers urgently required.

Haze formation.
New wipers urgently required.

Chatter marks.
New wipers urgently required.

Frequently Asked Questions

1. The newly fitted wiper blades cause streaks on the windscree and chatter. What are the reasons?

- The springs could be too weak, or a wiper arm bearing point could be sticking. This could be one reason for lower wiper blade application pressures.
- The wrong angle of wiper arm tilt with respect to the windscreen is another cause of poor wiping. The rubber wiper blade elements (which “tip” every time the wiping direction is reversed) must be checked for the same angle of tilt in both directions of travel. If not, and they operate at different angles, this will negatively effect the “tip” characteristics at the reversing points (squeaking) and the application-pressure distribution (smearing). The wiper arms, to which the rubber wiper blade elements are attached, are responsible for the correct positioning. Faults of this type must be rectified by an expert, who holds the wiper arm with the appropriate tool at the bottom end and twists it in the correct direction at the other end.
- Poor wiping results can also be due to dirt and contamination which have dried on the windscreen and which cannot be washed off with clean water. We recommend that from time to time the windscreen is cleaned with a special oil and silicon removing cleaner. Please only use brand name products. Apply the undiluted cleaner to the windscreen and rinse it off with clean water.
- A further cause of problems can be the fitting of the wiper blade. If the wiper blade has not engaged completely in the Quick-Clip adapter, wiping results can be poor since the application force is not applied efficiently from the wiper blade to the wiper arm. Check the wiper blade fitting.

2. At high speeds, the wipers cause whistling noises, and some areas of the windscreen are not wiped.

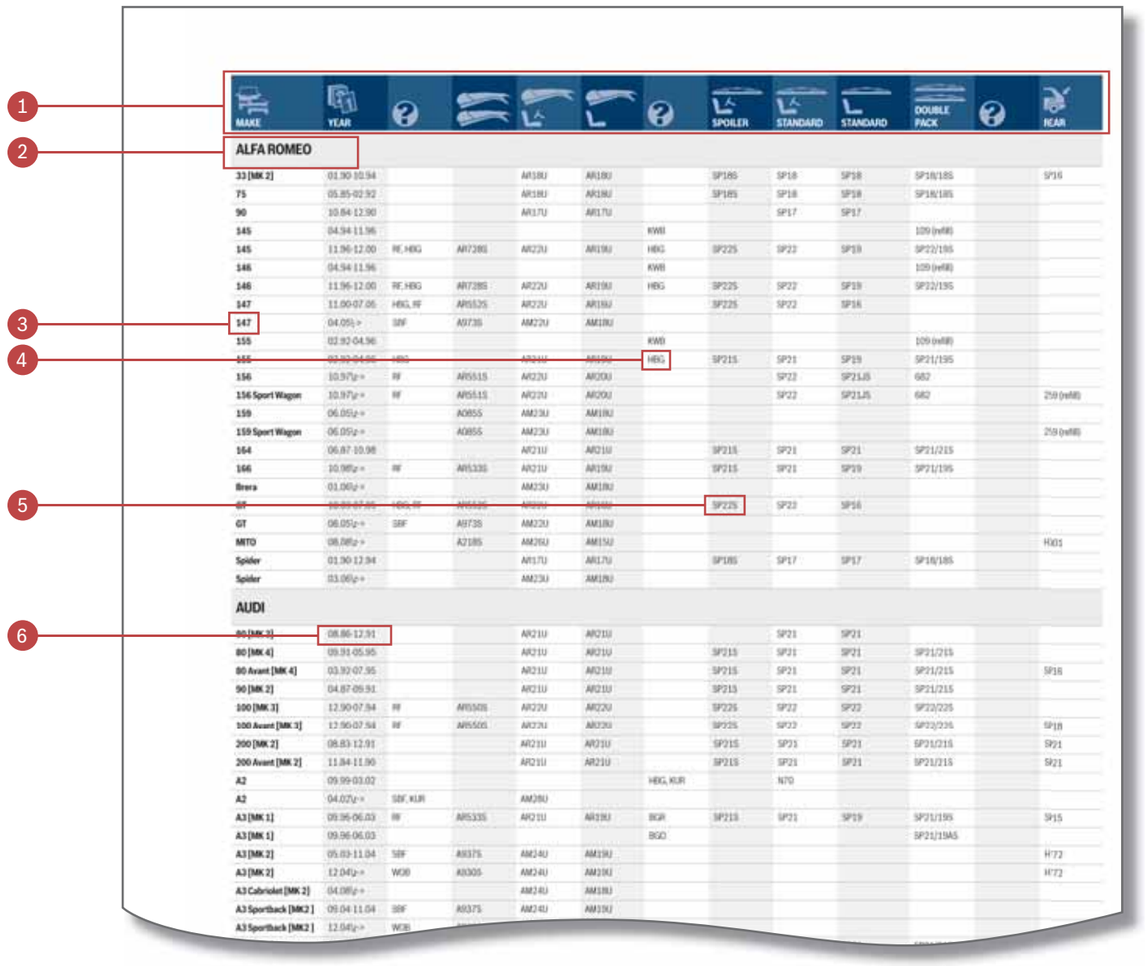

How fast may I drive with the wipers in operation?

- According to ECE Regulations, the wiper blades should be designed so that they do not lift off the windscreen due to the airstream until at least 80% of maximum speed is reached, or 160 km/h (100 mph). Bosch wiper blades fulfill these stipulations in all respects.

Notes for users

This catalogue contains the data from the vehicles, engines, and equipment for the European market from year of manufacture 1967 up to the year 2006. This data has been assembled from information provided by manufacturers and importers, and taken from Bosch documentation, as well as from investigations made on vehicles. It has been compiled to the best of our knowledge and belief, and reflects the status at the date of going to print.

It is impossible to avoid deviations caused by technical changes resulting from the conditions and regulations applying in a particular country. Bosch can therefore accept no liability for the completeness and faultlessness of the data. In case of mistakes and misprints which result in damage to property or assets, Bosch is only liable for immediate damages insofar as a gross breach of duty or wrongful intent apply. If personal injury is involved, Bosch is liable also in case of ordinary negligence.

Notes for users

This catalogue section lists part numbers of non-Bosch equipment for which there are interchangeable Bosch products or components available. Since a wide range of different designation systems are used, we were forced to arrange the non-Bosch part numbers in a uniform alphanumerical order. This differs from the customary order employed by some manufacturers. Reconversion of Bosch numbers back to the numbers of other manufacturers is not permitted.

Note: The laws governing competition stipulate that only Bosch type numbers may be used vis-à-vis the final customer for the identification of Bosch parts.

Abbreviations / Pictogram Explanations

ADD	Also use wiper blade adapter 3 392 390 298
BGO	Passenger side, curved
BGR	Passenger side, straight
BUS	For bus
EUR	European version only
FFB	Remove guide bracket
GA	Straight
GA1	Fork lever 3 397 911 046 is also to be used for this wiper blade
GA2	Fork lever 3 397 911 047 is also to be used for this wiper blade
GBO	Angled wiper blade
GEG	For vehicles with opposed wiper arm pattern
GFH	Large cab
GLF	For vehicles with tandem wiper arm pattern
HA	For cab-behind-engine version
HBG	Hook-type fastening
HUW	Eccentric-sweep wiper system
KOB	For station wagon
KUR	Wiper blade slightly shorter than original
KWB	For plastic wiper blade only
~~KWB~~	Plastic wiper blade cannot be fitted
LLE	For LHD vehicles
L35	Length: 350 mm
L40	Length: 400 mm
L45	Length: 450 mm
L50	Length: 500 mm
L55	Length: 550 mm
L60	Length: 600 mm
L70	Length: 700 mm
L80	Length: 800 mm
L90	Length: 900 mm
LA1	Length: 1000 mm
MGT	For vehicles with split rear door
MHK	For vehicles with tailgate
MHT	For vehicles with rear door
NOR	Standard version
OE	Fitted at top
PBG	Pin arm attachment
SBF	Side mounting
SBG	Snap-in fastener
SCR	Squareback
SDA	Spray jet at wiper arm
SDV	With pre-assembled spray jet
SEV	Interchangeable Bosch product or part for SEV
SGT	For split windscreen
SGW	For one-piece windscreen
SZS	Order spray pipe 3 397 000 669 separately
TU2	2 doors
TU3	3 doors
TU5	5 doors
TW	Product installed must be determined on vehicle or engine
UE	Installed at bottom
WOB	Attachment from above
WW	Optional
XXL	For large cabin
ZU2	Accessory 3 392 390 088 must also be used
